AIMS in Air Monitoring System Indoor

In-depth support for innovation and exploitation in Smart Systems Integration

What's different in your product?

Turn your smartness inside out

Product Name

AIMS In - Air Monitoring System Indoor

Product description

AIMS In is a multisensors device to monitor indoor air quality/comfort. It detects in real time the levels of CO₂, VOC and formaldehyde and through three colored leds provides a chromatic indication of the environmental quality. It also detects other physical parameters such as T, RH and lux. It is designed to have low consumption and to connect to a Wi-Fi network autonomously. The system is modular, expandable, interfaceable with different types of data collection system. It has widget to show measurements.
